

Pulp

Product Guide

For makers of good food...

Made from sturdy, compostable and sustainable wheatgrass, our pulp range of products includes meal trays, serving platters, portion cups and produce trays.

Much of our pulp range is not coated or lined, making pulp a fantastic choice from an environmental standpoint, as well as a practical and beautifully designed food packaging solution.

Lid Compatibility

Heat Sealable

Designed to be used with heat sealing machinery and a compatible film lidding.

Clip-On Lids Available

Clip-on lids are available with specific products in the pulp range.

Environment

Made from compostable and sustainable wheatgrass, the majority of our pulp product range (with the exception of our pulp meal trays) are not lined or coated, making pulp an exceptional, environmentally friendly alternative to single-use plastics.
