

In-line Automated Sealing Machine 1908 SKU

The efficient intermittent-motion of the 1908E sealing machine allows for sealing of between 5-27 trays per minute. Using continuous film rolls, trays are automatically discharged with an adjustable discharge shelf. This sealing machine also offers adjustable dwelling time and sealing platen force. Simple to operate, the continuous film rolls allow for quick meal preparation. Constructed of easy-to-clean stainless steel and anodized aluminium.
